

# Yohannes Mesay

## Full-stack Website Developer

Passionate full-stack developer dedicated to crafting user-friendly and responsive web applications. With expertise in Next.js and TypeScript, and a keen eye for clean, functional design—including real-time featured websites—I thrive on turning ideas into impactful solutions. I also have solid experience working on the backend using technologies like Prisma, Express, and more. Collaborating with talented developers on real-world challenges in a professional setting has refined my development workflows and deepened my understanding of both frontend and backend systems. Let's create something amazing together!
